Profile

I'm **Frontend developer**, looking for **Trainee** or **Junior** positions.

In University I had a big interest in both Game and AI industry, but chose Frontend because it matches my both strategic and creative mind.

What makes me **strategic**:

- I'm good at math and logical thinking

What is **creative** about me:

- I've been into classical music for 10 years and graduated at music boarding school in Lviv and my main hobby is photography.
